PROFILE

Detail-oriented Computer Science graduate (September 2026, Excellent with Honors) with hands-on experience analyzing real business data, building dashboards, and generating insights that support decision-making. Strong analytical mindset and rigorous attention to accuracy and data quality, with proven Excel skills (Pivot Tables, Power Query, data cleaning) and working knowledge of SQL and Power BI. Ranked 1st out of 15 participants in a LinkedIn Data Analytics competition. Eager to apply strong problem-solving, communication, and digitalization skills to support quality management, supplier evaluation, and audit processes.

EDUCATION

EELU — Faculty of Computer Science, IT Department *10/2022 – 09/2026*

Cairo, Egypt | GPA: 3.7/4.0 — Excellent with Honors

RELEVANT EXPERIENCE

Data Analytics Intern (Remote, Project-Based) — CodeAlpha *09/2026 – 10/2026*

- Collected and structured data for 1,000 books using Python, Requests, and BeautifulSoup.
- Performed exploratory data analysis (EDA) using Pandas, including statistical analysis and data visualization.
- Developed and deployed an interactive analytics dashboard using Streamlit and Plotly with dynamic filters, KPIs, and visual insights.
- Published project code and documentation on GitHub.

Data Analyst (Intern / Project-Based) — Freelancer / Competitions *01/2025 – Present*

- Analyzed 6 months of financial data for a real furniture company, identifying trends and cost-saving opportunities.
- Built interactive Power BI and Excel dashboards tracking expenses, categories, and performance trends for management decision-making.
- Ranked 1st among 15 participants in a LinkedIn Data Analytics competition.

FEATURED PROJECTS — BUSINESS & AI-POWERED SYSTEMS

ZAAD POS — Retail Management System | Founder & Product Owner *2026 – Present*

Tech Stack: React.js, Electron.js, JavaScript, SQLite, Tailwind CSS

- Led development of an offline-first point-of-sale and retail management system.
- Developed sales, inventory, purchasing, customer and supplier accounts, and business reporting features.
- Managed database operations, system testing, debugging, and performance improvements.
- Sold the system to its first client, turning the project into a commercial product.

Emdad ERP — Food Distribution & Inventory Management System *2026*

Independent Project

- Designed and deployed a full-stack inventory and distribution system for supermarket-scale food businesses, from data model to live web application (Supabase/PostgreSQL, Vercel), using AI-assisted architecture design.
- Implemented Row-Level Security, real-time inventory/finance updates, and role-based access for 5 user types (Admin, Sales, Warehouse, Purchasing, Finance), with Arabic (RTL) and EGP support.
- Designed, secured, and shipped a working data system end-to-end.

AI-Powered HR Resume Screening & Automation Pipeline 2026

Tech Stack: n8n, OpenRouter (LLM), JavaScript, Google Sheets

- Built an end-to-end automated screening pipeline in n8n triggered by incoming Gmail job applications, filtering target roles by subject-line criteria and extracting PDF resumes.
- Integrated an AI Agent via OpenRouter with tailored prompt engineering to parse resumes, evaluate candidates against job requirements, score suitability out of 10, and identify strengths and weaknesses.
- Developed custom JavaScript nodes to convert unstructured LLM outputs into structured JSON and automatically append ranked candidate records to Google Sheets for HR decision-making.

DATA ANALYTICS PROJECTS

Uber — Ride Data Analysis *08/2025*

- Analyzed ride-level revenue by trip type, time, and location; built Excel and Power BI KPI dashboards for ride volume, revenue, and completion rate.

Sallah Call Center — Saudi Arabia *06/2025*

- Analyzed call volume, handling time, and resolution rate to assess operational efficiency and identify bottlenecks using Excel and Power BI.

Adidas — Sales Performance Analysis *05/2025*

- Analyzed sales by product category and region, identifying top-performing lines and seasonal trends in Power BI reports.

Misuo — Financial Expense Analysis *04/2025*

- Cleaned and analyzed expense data, identifying spending patterns and creating budgeting visualizations.

COURSES

Mazen Analytics Lab *08/2025 – Present*

SKILLS

- Excel (Advanced): Pivot Tables, Power Query, data cleaning, visualization
- Power BI: Dashboards, DAX, data modeling | SQL: Queries, joins, aggregations
- Python: Pandas, Requests, BeautifulSoup | Streamlit, Plotly | GitHub | Automation: n8n, OpenRouter (LLM), Google Sheets, JSON
- Development: React.js, Electron.js, JavaScript, SQLite, Tailwind CSS
- PowerPoint: Data storytelling and presentation | Analytical thinking, problem-solving, communication and teamwork
